

Fusion® Series Treatment Systems

Robust, Job Ready, drop-in treatment units utilizing proven Clarus/Fuji Clean technology.

Features

Technology, like culture, develops with time to meet the specific needs of people. The technology to safely and efficiently treat wastewater is no exception. As the population of the United States grows, so too does our need to be more conscientious about waste treatment. Much can be learned from others around the world who have been successfully overcoming these challenges.

Today, Clarus Environmental together with Fuji Clean, bring proven technology to the American onsite wastewater market. This Fusion® technology, coupled with the outstanding quality and customer support that sets Clarus apart, creates a new standard for wastewater treatment in this country. Now, as always, Clarus Environmental strives to bring the best possible products to the customers we serve.

- Treatment process - Attached growth, anaerobic and aerobic
- Performance - <10 mg/L CBOD₅; <14 mg/L TSS (numbers based upon NSF Std 40 Class I Certification)
- Material - Noncorrosive in septic environment
